SOLAR SYSTEM RESEARCH
Volume 6, Numbers 1-4, 1972
(A translation of Astronomicheskii Vestnik)

A

Aleksandrov, Yu. V. - 7
Argunov, P. P. - 45
Astavin-Razumin, D. L. - 225
Avramchuk, V. V. - 147, 194

B

Bakharev, A. M. - 220
Batylova, O. P. - 55
Bel'kovich, O. I. - 161
Bezuglova, V. D. - 177
Bondar', N. I. - 55, 112, 177
Bronshtén, V. A. - 18
Bugaenko, L. A. - 198
Bygaenko, L. A. - 15

C

Chernov, V. M. - 220, 227
Chultem, Ts. - 214

D

Davudov, Yu. D. - 147
Demidovich, E. G. - 62
Dobrovol'skii, O. V. - 121
Dolginov, A. Z. - 173
Drozdov, S. V. - 119
D'yakov, A. A. - 87
Dzhapiashvili, V. P. - 5

F

Fast, N. P. - 116
Frolov, V. V. - 55, 112

G

Gaiduk, A. R. - 147, 188
Galkin, L. S. - 198
Gvozdeva, L. G. - 202

I

Ibraev, T. A. - 92
Ibragimov, N. B. - 147, 194

K

Kaminker, A. D. - 173
Karpenko, A. V. - 98
Kashcheev, B. L. - 87
Katasev, L. A. - 209
Klevetskii, V. N. - 84
Komarnitskaya, N. I. - 30
Koval', I. K. - 147
Kramer, E. N. - 24
Kremneva, N. M. - 55, 112
Kresak, L. - 65
Krugov, V. D. - 75, 147, 150
Kulikova, N. V. - 209
Kuz'min, A. D. - 10, 64, 158

L

Lagutin, M. F. - 161
Lavrukhina, A. K. - 92
Losovskii, B. Ya. - 64, 158
Lupishko, D. F. - 7

M

Makalkin, A. B. - 153
Makarenko, N. L. - 136
Martynenko, V. V. - 55, 112, 222
Morozhenko, A. V. - 198

N

Naumov, A. P. - 10
Nesmyanovich, A. T. - 1
Novak, Z. L. - 177
Novikov, V. V. - 143

O

Onishchenko, S. A. - 53
Orlov, V. P. - 38

P

Popov, A. P. - 143
Poroshin, A. P. - 62

R

Ruskol, E. L. - 80

S

Shestaka, I. S. - 166
Shibanov, Yu. A. - 173
Sincheskul, B. F. - 53
Slivenko, E. F. - 194
Smagin, D. M. - 161
Smirnova, T. V. - 10
Sorokina, L. P. - 68
Stanyukovich, A. K. - 202

T

Teifel', V. G. - 68
Tsvetkov, V. I. - 43

U

Ul'yanich, N. G. - 1
Usol'tseva, L. A. - 68

V

Vorob'eva, V. A. - 24
Vsekhsvyat-skii, S. K. - 98

Z

Zinov'ev, V. A. - 105

SOLAR SYSTEM RESEARCH
Volume 6, Numbers 1-4, 1972

(A translation of Astronomicheskii Vestnik)

## Volume 6, Number 1 January-March, 1972

| | Engl. | Russ. |
|---|---|---|
| Chromospheric Layers as a Source of Directional Particle Fluxes—A. T. Nesmyanovich and N. G. Ul'yanich | 1 | 3 |
| A Transient Phenomenon in the Lunar Crater Posidonius—V. P. Dzhapiashvili | 5 | 7 |
| The Distribution Function of the Normal Albedo of the Surface of Mars—Yu. V. Aleksandrov and D. F. Lupishko | 7 | 9 |
| Estimate of Ammonia Concentration in Subcloud Atmosphere of Saturn from Radio-Astronomy Measurements—A. D. Kuz'min, A. P. Naumov, and T. V. Smirnova | 10 | 13 |
| Monochromatic Brightness Coefficients of the Giant Planets—L. A. Bygaenko | 15 | 19 |
| Propagation of Air Shock Waves from the Tunguska Meteorite, with Atmospheric Inhomogeneity Considered—V. A. Bronshten | 18 | 22 |
| Deceleration of Meteoric Objects in the Visible Part of the Trajectory—V. A. Vorob'eva and E. N. Kramer | 24 | 29 |
| Capture by the Earth of Dust Particles Moving near the Ecliptic Plane—N. I. Komarnitskaya | 30 | 35 |
| Contribution of Lunar Particles to the Sporadic Meteor Background—V. P. Orlov | 38 | 44 |
| Mass Distribution of Individual Specimens of the Sikhote-Alin Meteorite Shower—V. I. Tsvetkov | 43 | 49 |
| Spherical-Optics Isochromatic Telescope Systems—P. P. Argunov | 45 | 52 |
| OBSERVATIONS | | |
| Passage of Mercury across Solar Disk on May 9, 1970, as Observed from Poltava—S. A. Onishchenko and B. F. Sincheskul | 53 | 62 |
| 1969 Perseid Radiants—O. P. Batylova, N. I. Bondar', N. K. Kremneva, V. V. Martynenko, and V. V. Frolov | | |
| Observational Results of Lunar Occultations of Stars at Gorky in 1968-1969—E. G. Demidovich and A. P. Poroshin | 62 | 69 |
| Letter to the Editor—A. D. Kuz'min and B. Ya. Losovskii | 64 | 71 |

## Volume 6, Number 2 April-June, 1972

| | | |
|---|---|---|
| Origin of Short-Period Meteor Streams—L. Kresak | 65 | 73 |
| Optical Characteristics and Structure of the Jovian Atmosphere V. Probable Structure of the Ammonia Aerosol Layer—L. P. Sorokina, V. G. Teifel', and L. A. Usol'tseva | 68 | 77 |
| Photometric Characteristics of Jupiter and Saturn in the 0.48-0.33-$\mu$ Range—V. D. Krugov | 75 | 85 |
| The Role of the Satellite Swarm in the Origin of the Earth's Rotation—E. L. Ruskol | 80 | 91 |
| Definitive Orbit of the Comet 1937 V Finsler—V. N. Klevetskii | 84 | 96 |
| Determination of the Velocity of a Radio Meteor with Minimum RMS Error—A. A. D'yakov and B. L. Kashcheev | 87 | 99 |
| Preatmospheric Dimensions of Meteorites—A. K. Lavrukhina and T. A. Ibraev | 92 | 104 |

OBSERVATIONS
Activity of Jupiter in 1965-1970—S. K. Vsekhsvyat-skii and A. V. Karpenko . . . . . 98 112
Synoptic Observations of Jupiter—V. A. Zinov'ev. . . . . 105 119
The $\alpha$-Lyrids Meteor Shower in 1969—N. I. Bondar', N. M. Kremneva, V. V. Martynenko, and V. V. Frolov . . . . . 112 127
Observations of Noctilucent Clouds by the Tomsk Division of the All-Union Astronomical and Geodetic Society, 1969-1970—N. P. Fast . . . . . 116 131
Accuracy in Observations of Times of Contacts of the Earth's Shadow with Lunar Formations According to the 18 Eclipse Observations from 1910 to 1959—S. V. Drozdov . . . . . 119 133

## Volume 6, Number 3 July-September, 1972

Comet Astronomy in the USSR—O. V. Dobrovol'skii . . . . . 121 137
A Method for Determining the Position of the Moon's Center of Mass from Earth-Based Observations—N. L. Makarenko . . . . . 136 153
Comparison of Linear Polarization and Albedo of Igneous Rocks in the Spectral Region 0.75—3.0 $\mu$ and Lunar Values of Those Parameters—V. V. Novikov and A. P. Popov. 143 160
Photographic Observations of Mars during the Great Opposition of 1971—V. V. Avramchuk, A. R. Gaiduk, Yu. D. Davudov, N. B. Ibragimov, L. K. Koval', and V. D. Krugov . . . . . 147 165
Temporal Variation of Ultraviolet Absorption in Continuous Spectra of Jupiter and Saturn—V. D. Krugov . . . . . 150 168
The Structure of Models of Neptune—A. B. Makalkin . . . . . 153 172
Radio Emission of Callisto—A. D. Kuz'min and B. Ya. Losovskii . . . . . 158 177
Effect of Selectivity on the Observed Distribution of Orbital Parameters for Radio Meteors—O. L. Bel'kovich, M. F. Lagutin, and D. M. Smagin . . . . . 161 180
Ablation Coefficient and Maximum Brightness of a Meteor—L. S. Shestaka . . . . . 166 186
Correlation between Solar Activity and Tidal Forces—A. Z. Dolginov, A. D. Kaminker, and Yu. A. Shibanov. . . . . 173 195
Jupiter in 1966-1968—V. D. Bezuglova, N. G. Bondar', and Z. L. Novak . . . . . 177 200

## Volume 6, Number 4 October-December, 1972

Fiftieth Anniversary of the Formation of the USSR . . . . . 185 209
Contrast Measurement Data of Martian Maria in July-August, 1971 — A. R. Gaiduk . . . . . 188 212
Spectrophotometry of the 7250-Å Methane Absorption Band over the Disk of Jupiter — V. V. Avramchuk, N. B. Ibragimov, and E. F. Slivenko. . . . . 194 218
Molecular Absorption in the Atmospheres of the Giant Planets — L. A. Bugaenko, L. S. Galkin, and A. V. Morozhenko. . . . . 198 223
Reflection of Meteorite Generated Shock Waves from the Earth's Surface — L. G. Gvozdeva and A. K. Stanyukovich . . . . . 202 228
Yarkovskii-Radzievskii Effect and the Evolution of Meteor Swarms — L. A. Katasev and N. V. Kulikova . . . . . 209 237
Temperature Variations of Coronal Regions near a Solar Prominence — Ts. Chultem. . . . 214 242
Brightness of Future Lunar Eclipses — A. M. Bakharev and V. M. Chernov . . . . . 220 249
The Meteor Showers $\varepsilon$-Lyrids, $\alpha$-Coronids, and $\varphi$-Draconids in 1969 — V. V. Martynenko . . . . . 222 252
Polarization of the Resultant Emission of the Corona during the Solar Eclipse of March 7, 1970 — D. L. Astavin-Razumin . . . . . 225 255
Total Lunar Eclipse of August 6, 1971 — V. M. Chernov . . . . . 227 257
